

**Event Name:** Guest lecture on the topic “**AMH as a Marker in Ovarian Reserve.**”

**From Date:** **27.11.2025**

**To Date:** -

**Organized by:** Biochem Nexus- PG and Research Department of Biochemistry

**Academic Year:** 2025 -2026 (Even Sem)

**Report:**

Biochem Nexus - PG and Research Department of Biochemistry organized an insightful association activity on 27th November 2025 on the topic “**AMH as a Marker in Ovarian Reserve.**” The session aimed to provide students with an updated understanding of fertility biomarkers and the clinical importance of Anti-Müllerian Hormone (AMH) in assessing ovarian reserve.

The event commenced with a prayer song, followed by a warm welcome address. **Dr. Vanitha S., Senior Lecturer, Department of Clinical Biochemistry, CMC Vellore**, served as the chief guest and resource person. Dr. Vanitha shared her expert knowledge on the physiology of AMH, its role in folliculogenesis, and its significance as a reliable biomarker for evaluating ovarian reserve. Her detailed presentation helped the students understand both the biochemical principles and the clinical interpretation of AMH values, making the session highly informative and engaging.

As part of the association activity, a poster presentation was conducted for both UG and PG students. The prize winners were selected by the resource person. The event concluded with a vote of thanks, expressing gratitude to the chief guest for her valuable contribution and to the faculty and students for their active participation. Overall, the program was highly beneficial and enriched the students’ understanding of current clinical diagnostic markers.
