

**AUXILIUM COLLEGE (AUTONOMOUS)**

**VELLORE – 632 006**

**Department of Computer Applications (B.C.A.)**

**B.C.A.**

**SYLLABUS AND REGULATIONS**

**(Based on TANSICHE Model Syllabus)**

**Under**

**OUTCOME BASED EDUCATION PATTERN**

**With**

**CHOICE BASED CREDIT SYSTEM**

**For the Candidates Admitted from 2024-2025 Onwards**

## **Department of Computer Applications (B.C.A.) - (UG)**

**(Effective from the academic year 2024-2025)**

### **Vision of the Department:**

- To provide a intellectual environment that fosters the search for new knowledge in a highly dynamic computing world
- To be a leading, contemporary, innovative programme in inculcating professional competencies in the field of Computing and related interdisciplinary technologies to achieve academic excellence and to facilitate research activities as a timely response to dynamic needs and challenges of industry and society.

### **Objectives:**

- To provide study of quantity, structure, space and change, focusing on problem solving in Computer Application.
- To acquire skill and competency in practical.
- To expose the students to the recent trends in Computer and other related areas.
- To motivate the students learning software and architecture.

To train economically backward students and make them eligible for higher education and job opportunities.

To tap out the talents through extracurricular and co-curricular activities.

To get sensitized to social and environmental realities.

### **Eligibility for admission to B.C.A.:**

The basic BCA eligibility is to possess an aggregate of 50% or above in Class 12 in any stream (Arts, Science, Commerce) with English as a compulsory subject.

### **Highlights of the Revamped Curriculum:**

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application-oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, practical training, catering to the needs of stakeholders with research aptitude.
- The curriculum is designed to strengthen the industry-academia interface and provide more job opportunities for the students.
- The Internship during the second-year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the students to apply their conceptual knowledge to practical situations. Such innovative provisions of the industrial training/project/internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective and Skill Enhancement Courses, covering conventional topics to the application oriented.

**Value additions in the Revamped Curriculum:**

<b>Semester</b>	<b>Newly introduced Components</b>	<b>Outcome/Benefits</b>
<b>I</b>	<b>Foundation Course</b> To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning abstract Mathematics and simulating mathematical Concepts to real world.	<ul style="list-style-type: none"> <li>• Instill confidence among students</li> <li>• Create interest for the subject</li> </ul>
<b>I,II,III,IV</b>	<b>Skill Enhancement papers</b> (Discipline centric / Generic/ Entrepreneurial)	<ul style="list-style-type: none"> <li>• Industry ready graduates</li> <li>• Skilled human resource</li> <li>• Students are equipped with essential skills to make them employable</li> </ul>
		<ul style="list-style-type: none"> <li>• Training on Computing / Computational skills Enable the students gain knowledge and exposure on latest computational aspects</li> </ul>
		<ul style="list-style-type: none"> <li>• Data analytical skills will enable students gain internships, apprentice ships, field work involving data collection, compilation, analysis etc.</li> </ul>
		<ul style="list-style-type: none"> <li>• Entrepreneurial skill training will provide an opportunity for independent livelihood</li> <li>• Generates self-employment</li> <li>• Create small scale entrepreneurs</li> <li>• Training to girls leads to women empowerment</li> </ul>
		<ul style="list-style-type: none"> <li>• Discipline centric skill will improve the Technical knowledge of solving real life problems using ICT tools</li> </ul>

<b>III,IV,V &amp;VI</b>	Elective papers- An open choice of topics categorized under Generic and Discipline Centric	<ul style="list-style-type: none"> <li>• Strengthening the domain knowledge</li> <li>• Introducing the stake holders to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature</li> <li>• Students are exposed to Latest topics on Computer Science / IT, that require strong mathematical background</li> <li>• Emerging topics in higher education/industry/ communication network / health sector etc. are introduced with hands-on-training, facilitates designing of mathematical models in the respective sectors</li> </ul>
<b>IV</b>	Industrial Statistics	<ul style="list-style-type: none"> <li>• Exposure to industry moulds students into solution providers</li> <li>• Generates Industry ready graduates</li> <li>• Employment opportunities enhanced</li> </ul>
<b>II year Vacation activity</b>	Internship/ Industrial Training	<ul style="list-style-type: none"> <li>• Practical training at the Industry/ Banking Sector/ Private / Public sector organizations/ Educational institutions, enable the students gain professional experience and also become responsible citizens.</li> </ul>
<b>V Semester</b>	Project with Viva-voce	<ul style="list-style-type: none"> <li>• Self-learning is enhanced</li> <li>• Application of the concept to real situation is conceived resulting in tangible outcome</li> </ul>
<b>VI Semester</b>	Introduction of Professional Competency component	<ul style="list-style-type: none"> <li>• Curriculum design accommodates all category of learners; Mathematics for Advanced Explain component will comprise of advanced topics in Mathematics and allied fields, for those in the peer group / aspiring researchers</li> <li>• Training for Competitive Examinations‘ caters to the needs of the aspirants towards most sought-after services of the nation viz, UPSC, CDS, NDA, Banking Services, CAT, TNPSC group services, etc.</li> </ul>
<b>Extra Credits: For Advanced Learners / Honors degree</b>		<ul style="list-style-type: none"> <li>• To cater to the needs of peer learners / research aspirants</li> </ul>
<b>Skills acquired from the Courses</b>		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

**TANSICHE BASED PROGRAMME STRUCTURE FOR B.C.A.

#### Activity-based Assessment for Skill Enhancement Courses:

- Activity 1 for Unit I: (Nature of Activity) – 20 marks  
 Activity 2 for Unit II: (Nature of Activity) – 20 marks  
 Activity 3 for Unit III: (Nature of Activity) – 20 marks  
 Activity 4 for Unit IV: (Nature of Activity) – 20 marks  
 Activity 5 for Unit V: (Nature of Activity) – 20 marks

Nature of Activity – Field visit/ Industrial visit/ Project (individual or group)/ Exhibits/ Model making/ Hands on training/ Lab practice/ Product making/ Extempore/ Block and Tackle/ Debate/ Report writing/ Case study/ Interpretation of data or results/ Transcription/ Quiz (LMS)/ Problem solving/ Designing/ Role play/ Start-up proposal/ Research proposal/ Poster presentation/ Oral presentation (live or video recorded)/ Survey (Field or Online)/ Group discussion/ Problem solving/ Problem formulation/ Interviews/ Concept mapping/

Mind mapping/ Promoting public awareness etc.

Record of Assessment will be maintained by the course instructors and verified by the Head of the department.

<b>Cognitive Levels of Assessment</b>	
<b>Recall (K1)</b>	Simple definitions, MCQ, Recall steps, Concept definitions
<b>Understand/ Comprehend (K2)</b>	MCQ, True/False, Short essays, Concept explanations, short summary or Overview
<b>Application (K3)</b>	Suggest idea/ concept with examples, suggest formulae, Solve problems, Observe, Explain
<b>Analyze (K4)</b>	Problem-solving questions, finish a procedure in many steps, Differentiate Between various ideas, Map knowledge
<b>Evaluate (K5)</b>	Longer essay/ Evaluation essay, Critique or justify with pros and cons
<b>Create (K6)</b>	Check knowledge in specific or off beat situations, Discussion, Debating or Presentations

#### **PROGRAMME OUTCOMES (PO)**

**On completion of the UG Programme, the students will be able to:**

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills.

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

#### **PROGRAMME SPECIFIC OUTCOMES (PSO)**

**On completion of the UG Programme in Computer Applications (B.C.A.), the students will be able to:**

**PSO1:** Equip the students with requisite knowledge, skills and right attitude necessary to provide effective software development skills in a global environment and also focus on preparing students for roles pertaining to computer applications and IT industry.

**PSO2:** Acquire skills in computer and information technology and also be competent in the field of Commerce, Mathematics and Management.

**PSO3:** Introduce and update knowledge relevant to IT like networking, computer graphics, web development, trouble shooting, and hardware and software skills. Also to develop software

solutions to problems across a broad range of application domains through analysis and design.

**PSO4:** Become proficient and ensure job in the key areas of computer science like Web designing and development, Mobile applications, Network and communication technologies, undertaking government organizations, faculty for computer science and applications in educating institutions.

**PSO5:** Ability to analyze social and environmental aspects with professional values, ethics and equity to transform the knowledge, skills and expertise to the community.

**PSO6:** Ability to work as a member or leader in diverse teams in multidisciplinary environment. An identify opportunities, entrepreneurship vision and use of innovative ideas to create value and wealth for the betterment of the individual and society.

PO6	M	M	M	M	M	M

(HIGH-3, MODERATE-2, LOW-1)

### Consolidated Semester wise and Component wise Credit distribution

Parts	Sem I	Sem II	Sem III	Sem IV	Sem V	Sem VI	Total Credits
Part I	3	3	3	3	-	-	12
Part II	3	3	3	3	-	-	12
Part III	13	13	13	13	21	17	90
Part IV	4	4	3	6	2	4	23
Part V	-	-	-	-	-	1	1
Other	-	-	2	-	-	-	2
<b>Total</b>	23	23	24	25	23	22	<b>140</b>

\*Part I, II and Part III components will be separately considered for CGPA calculation and classification for the under graduate programme and the other components. IV, V must be completed during the duration of the programme as per the norms, to be eligible for obtaining the UG degree.

<b>Title of the Course</b>	<b>Python Programming</b>						
<b>Paper No.</b>	<b>Core 1</b>						
<b>Category</b>	<b>Core</b>	<b>Year</b>	I	<b>Credits</b>	5	<b>Course Code</b>	UCCAA24
		<b>Semester</b>	I				
<b>Instructional hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	5		-		5		
<b>Pre requisites</b>	Higher Secondary						
<b>Objectives of the course</b>	<p>The course aims at giving an overall view of the</p> <ul style="list-style-type: none"> <li>● To make students understand the concepts of Python programming..</li> <li>● To apply the OOPs concept in PYTHON programming.</li> <li>● To impart knowledge on demand and supply concepts.</li> <li>● To make the students learn best practices in PYTHON programming.</li> <li>● To know the costs and profit maximization.</li> </ul>						
<b>Course Outline</b>	<p><b>UNIT- I: (12 hours) (K1, K2, K3 &amp; K4)</b></p> <p>1.1 Basics of Python Programming: History of Python</p> <p>1.2 Features of Python-Literal-Constants-Variables</p> <p>1.3 Identifiers–Keywords-Built-in Data Types</p> <p>1.4 Output Statements-Input Statements-Comments -Indentation</p> <p>1.5 Operators-Expressions-Type conversions.</p> <p>1.6 Python Arrays: Defining and Processing Arrays – Array methods.</p>						
	<p><b>UNIT- II: (12 hours) (K1, K2, K3 &amp; K4)</b></p> <p>2.1 Control Statements: Selection</p> <p>2.2 Conditional Branching statements</p> <p>2.3 If, if-else, nested if and if-elif-else statements.</p> <p>2.4 Iterative Statements: while loop, for loop, else suite in loop and nested loops.</p> <p>2.5 Jump Statements, break, continue and pass statements.</p>						
	<p><b>UNIT-III: (12 hours) (K1, K2, K3 &amp; K4)</b></p> <p>3.1 Functions: Function Definition – Function Call Variable Scope and its Lifetime.</p> <p>3.2 Return Statement. Function Arguments: Required Arguments,</p>						

	<p>Keyword Arguments, Default Arguments and Variable Length Arguments.</p> <p>3.3 Recursion Python Strings: String operations - Immutable Strings - Built-in String Methods and Functions - String Comparison.</p> <p>3.4 Modules: import statement - The Python module – dir() function.</p> <p>3.5 Modules and Namespace</p> <p>3.6 Defining our own modules.</p>
	<p><b>UNIT-IV: (12 hours) (K1, K2, K3 &amp; K4)</b></p> <p>4.1 Lists: Creating a list- Access values in List- Updating values in Lists- Nested lists- Basic list operations- List Methods.</p> <p>4.2 Tuples: Creating, Accessing, Updating and Deleting Elements in a tuple.</p> <p>4.3 Nested tuples–Difference between lists and tuples.</p> <p>4.4 Dictionaries: Creating, Accessing, Updating and Deleting Elements in a Dictionary.</p> <p>4.5 Dictionary Functions and Methods</p> <p>4.6 Difference between Lists and Dictionaries.</p>
	<p><b>UNIT-V: (12 hours) (K1, K2, K3 &amp; K4)</b></p> <p>5.1 Python File Handling: Types of files in Python - Opening and Closing files.</p> <p>5.2 Reading and Writing files: write() and write lines() methods</p> <p>5.3 Append() method– read() and read lines() methods–with keyword– Splitting words</p> <p>5.4 File methods- File Positions</p> <p>5.5 Renaming and deleting files</p>
Extended Professional Component (is a part of internal component only, not to be included in the	<p>Questions related to the above topics, from various competitive examinations UPSC/ JAM/ TNPSC and others to be solved</p> <p>(To be discussed during the Tutorial hours)</p>

external examination Question paper)

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:**Demonstrate the understanding of syntax and semantics.

**CO2:** Identify the problem and solve using PYTHON programming techniques.

**CO3:** Identify suitable programming constructs for problem solving.

**CO4:** Analyze various concepts of PYTHON language to solve the problem in an efficient way.

**CO5:** Develop a PYTHON program for a given problem and test for its correctness.

		<b>Semester</b>	I				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	2	-	-		2		
<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ul style="list-style-type: none"> <li>● To familiarize the students with the Programming basics and the fundamentals of C, Data types in C, Mathematical and logical operations.</li> <li>● To understand the concept using if statements and loops</li> <li>● This unit covers the concept of Arrays</li> <li>● This unit covers the concept of Functions</li> <li>● To understand the concept of implementing pointers.</li> </ul>						
<b>Course Outline</b>	<b>UNIT- I: (12 hours)</b>						
	Overview of C: Importance of C, sample C program, C program structure, executing C program - Constants, Variables, and Data Types: Character set, C tokens, keywords and identifiers, constants, Variables, data types, declaration of variables, assigning values to variables - Assignment statement, declaring a variable as constant, as volatile. - Operators and Expression. - Managing Input Operations, Managing Output Operations						
	<b>UNIT - II: (12 hours)</b>						
	Decision Making and Branching : Decision making with If, - Simple IF, IFELSE, nested IFELSE, ELSEIF ladder, - Switch, GOTO statement. -Decision Making and Looping: While, Do-While, - For, Jumps in loops.						
	<b>UNIT-III :(12 hours)</b>						
Arrays: Declaration and accessing of one & two-dimensional arrays,- Initializing two-dimensional arrays,-Multidimensional arrays. -Dynamic Array - Predefined Streams							
<b>UNIT-IV:(12 hours)</b>							
Functions: The form of C functions, Return values and types, calling a function, categories of functions, Nested functions,Recursion, functions with arrays, call by value, Call by reference, storage classes Character arrays. String functions							
<b>UNIT-V:(12 hours)</b>							
Pointers: definition, declaring and initializing pointers, Accessing a variable through address and through pointer, Pointer expressions, pointer increments and							

	scale factor, Pointers and arrays, Pointers and functions. Pointers and structures.

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Remember the program structure of C with its syntax and semantics

**CO2:** Understand the programming principles in C (datatypes, operators, branching and looping, arrays, functions, structures, pointers and files).

**CO3:** Apply the programming principles learnt in real-time problems.

**CO4:** Analyze the various methods of solving a problem and choose the best method.

**CO5:** Code, debug and test the programs with appropriate test cases.

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Learn the basics of computer, Construct the structure of the required things in computer learn how to use it.

**CO2:** Develop organizational structure using for the devices present currently under input or output unit.

**CO3:** Concept of storing data in computer using two header namely RAM and ROM with different types of ROM with advancement in storage basis.

**CO4:** Work with different software, Write program in the software and applications of software.

**CO5:** Usage of Operating system in information technology which really acts as a interpreter between software and hardware.

--------------------------------------	--

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Understand the basic Object-oriented concepts. Implement the basic constructs of Core Java.

**CO2:** Implement inheritance, packages, interfaces and exception handling of Core Java.

**CO3:** Implement multi-threading and I/O Streams of Core Java

**CO4:** Implement AWT and Event handling.

**CO5:** Use Swing to create GUI.

<b>Title of the Course</b>	<b>PRACTICAL III: PROGRAMMING IN JAVA LAB</b>						
<b>Paper No.</b>	<b>Core 6</b>						
<b>Category</b>	<b>Practical</b>	<b>Year</b>	II	<b>Credits</b>	3	<b>Course Code</b>	UCCAF24
		<b>Semester</b>	III				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	-	-	3		3		
<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. To provide fundamental knowledge of object-oriented programming.</li> <li>2. To equip the student with programming knowledge in Core Java from the basics up.</li> <li>3. To enable the students to know about Event Handling.</li> <li>4. To enable the students to use String Concepts.</li> <li>5. To equip the student with programming knowledge in to create GUI using AWT controls.</li> </ol>						
<b>Course Outline</b>	<p><b>Practical Programs:(30 hours)</b></p> <ol style="list-style-type: none"> <li>1. Write a Java program that prompts the user for an integer and then prints Out all the prime numbers up to that Integer.</li> <li>2. Write a Java program to multiply two given matrices.</li> <li>3. Write a Java program that displays the number of characters, lines and words in a text</li> <li>4. Generate random numbers between two given limits using Random class and print messages according to the range of the value generated.</li> <li>5. Write a program to do String Manipulation using Character Array and perform the following string operations: <ol style="list-style-type: none"> <li>a. String length.</li> <li>b. Finding a character at a particular position.</li> <li>c. Concatenating two strings.</li> </ol> </li> </ol>						

6. Write a program to perform the following string operations using String class:
  - a. StringConcatenation.
  - b. Searchasubstring.
  - c. Toextractsubstringfromgivenstring.
7. Write a program to perform string operations using String Buffer class:
  - a. Length of a string.
  - b. Reverse a string.
  - c. Delete a sub string from the given string
8. Write a java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.
9. Write a threading program which uses the same method asynchronously to print the numbers1to10 using Thread 1 and to print 90 to 100 using Thread2.
10. Write a program to demonstrate the use of following exceptions.
  - a. Arithmetic Exception
  - b. Number Format Exception
  - c. Array Index Out of Bound Exception
  - d. Negative Array Size Exception
11. Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes
12. Write a program to accep ta text and change its size and font. Include bold italic options. Use frames and controls.
13. Write a Java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. (Use adapter classes).
14. Write a Java program that works as a simple calculator. Use a grid layout

	<p>to arrange buttons for digits and for +, -, *, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.</p> <p>15. Write a Java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green with radio buttons. On selecting a button, an appropriate message with—stop  or—ready  or—go   should appear above the buttons in a selected color. Initially there is no message shown.</p>

<b>Title of the Course</b>	<b>SEC: PHP PROGRAMMING</b>						
<b>Paper No.</b>	<b>SEC-4</b>						
<b>Category</b>	<b>Practical</b>	<b>Year</b>	II	<b>Credits</b>	1	<b>Course Code</b>	USCA424
		<b>Semester</b>	III				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
		-	2		2		
<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. To provide the necessary knowledge on basics of PHP.</li> <li>2. To design and develop dynamic, database -driven web applications using PHP version.</li> <li>3. To get an experience on various web application development techniques.</li> <li>4. To learn the necessary concepts for working with the files using PHP.</li> <li>5. To get a knowledge on OOPS with PHP.</li> </ol>						
<b>Course Outline</b>	<b>UNIT-I :(13 hours)</b> Introduction to PHP -Basic Knowledge of websites - Introduction of Dynamic Website - Introduction to PHP -Scope of PHP - XAMPP and WAMP Installation.						
	<b>UNIT-II: (11 hours)</b> PHP Programming Basics - Syntax of PHP - Embedding PHP in HTML - Embedding HTML in PHP - Introduction to PHP Variable - Understanding Data Types -Using Operators -Using Conditional Statements -If(), else if() and else if condition Statement.						
	<b>UNIT-III: (12 hours)</b> Switch() Statements -Using the while() Loop- Using the for ()Loop PHP Functions -PHP Function -Creating an Array - Modifying Array Elements.- Processing Arrays with Loops - Creating forms to Display, Add, Edit and Delete files- Grouping Form Selections with Arrays- Using Array Functions.						
	<b>UNIT-IV: (12 hours)</b> PHP Advanced Concepts -Reading and Writing Files- Reading Data from a File.						
	<b>UNIT-V: (12 hours)</b> Managing Sessions. -Using Session Variables - Destroying a Session -Storing Data in Cookies - Setting Cookies.

<b>Title of the Course</b>	<b>SEC: SOFTWARE TESTING</b>						
<b>Paper No.</b>	<b>SEC-7</b>						
<b>Category</b>	<b>Elective</b>	<b>Year</b>	II	<b>Credits</b>	2	<b>Course Code</b>	USCA724
		<b>Semester</b>	IV				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
		-	2		2		
<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. To study fundamental concepts in software testing</li> <li>2. To discuss various software testing issues and solutions in software unit test, integration and system testing.</li> <li>3. To study the basic concept of Data flow testing and Domain testing.</li> <li>4. To Acquire knowledge on path products and path expressions.</li> </ol> <p>To learn about Logic based testing and decision tables.</p>						
<b>Course Outline</b>	<b>UNIT-I :(6 hours)</b>						
	Introduction: Purpose–Productivity and Quality in Software -Testing Vs Debugging - Model for Testing – Bugs - Types of Bugs - Testing and Design Style.						
	<b>UNIT-II: (6 hours)</b>						
	Flow / Graphs -Path Testing- Achievable paths -Path instrumentation Application - Transaction Flow Testing Techniques.						
	<b>UNIT-III: (6 hours)</b>						
Data Flow Testing Strategies -Domain Testing: Domains and Paths - Domains and Interface Testing.							
<b>UNIT-IV :(6 hours)</b>							
Linguistic -Metrics–Structural Metric-Path Products and Path Expressions - Syntax Testing – Formats -Test Cases							
<b>UNIT-V :(6 hours)</b>							
Logic Based Testing - Decision Tables-Transition Testing -States, State Graph -State Testing.

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Students learn to apply software testing knowledge and engineering methods.

**CO2:** Have an ability to identify the needs of Software Test automation, and define and develop a Test tool to support test automation.

**CO3:** Have an ability understand and identify various software testing problems, and solve these problems by designing and selecting software test models,criteria,strategies,and methods.

**CO4:** Have basic understanding and knowledge of contemporary issues in software testing, such as component –based software testing problems.

**CO5:** Have an ability to use software testing methods and modern software testing tools for their testing projects.

<b>Title of the Course</b>	<b>COMPUTER NETWORKS</b>						
<b>Paper No.</b>	<b>Core 9</b>						
<b>Category</b>	<b>Core</b>	<b>Year</b>	<b>III</b>	<b>Credits</b>	4	<b>Course Code</b>	UCCAI24
		<b>Semester</b>	V				
<b>Instructional hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	5		-		5		
<b>Prerequisites</b>	Operating System						
<b>Objectives of the course</b>	1. To learn the basic concepts of Data communication and Computer network. 2. To learn about wireless Transmission. 3. To learn about networking and data link layer. 4. To study about Network communication. 5. To learn the concept of Transport layer.						
<b>Course Outline</b>	<b>Unit I (15 Hours) (K1, K2)</b>  1.1 Introduction – Network Hardware – Software – Reference Models. 1.2 OSI and TCP/IP Models. 1.3 Example Networks: Internet, ATM. 1.4 Understanding Ethernet and Wireless LANs - Physical Layer. 1.5 Theoretical Basis for Data Communication 1.6 Guided Transmission Media.						
	<b>Unit II (15 Hours) (K1, K2, K3)</b>  2.1 Wireless Transmission. 2.2 Communication Satellites. 2.3 Telephone System: Structure, Local Loop. 2.4 Trunks and Multiplexing and Switching. 2.5 Data Link Layer: Design Issues. 2.6 Error Detection and Correction.						
	<b>Unit III (15 Hours) (K1, K2, K3, K4)</b>  3.1 Elementary Data Link Protocols - Sliding Window Protocols. 3.2 Data Link Layer in the Internet. 3.3 Medium Access Layer. 3.4 Channel Allocation Problem. 3.5 Multiple Access Protocols. 3.6 Bluetooth.						

	<b>Unit IV (15 Hours) (K1, K2)</b> 4.1 Network Layer - Design Issues. 4.2 Routing Algorithms. 4.3 Congestion Control Algorithms. 4.4 IP Protocol. 4.5 IP Addresses. 4.6 Internet Control Protocols.
	<b>Unit V (15 Hours) (K1, K2, K3, K4)</b> 5.1 Object Transport Layer – Services. 5.2 Connection Management. 5.3 Addressing - Establishing and Releasing a Connection. 5.4 Simple Transport Protocol. 5.5 Internet Transport Protocols (ITP). 5.6 Network Security: Cryptography.

**Course Outcomes:**

- CO1:** To understand the basics of Computer Network architecture, OSI and TCP/IP reference models
- CO2:** To gain knowledge on Telephone systems using wireless network
- CO3:** To understand the concept of MAC
- CO4:** To analyze the characteristics of Routing and Congestion control algorithms
- CO5:** To understand network security and define various protocols such as FTP, HTTP, Telnet, DNS

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Understand the various basic concepts of Data Base System. Difference between file system and DBMS and compare various datamodels.

**CO2:** Define the integrity constraints. Understand the basic concepts of Relational Data Model, Entity Relationship Model.

**CO3:** Design database schema considering normalization and relationships within database. Understand and construct database using Structured Query Language. Attain a good practical skill of managing and retrieving of data using Data Manipulation Language (DML).

**CO4:** Classify the different functions and various join operations and enhance the knowledge of handling multiple tables.

**CO5:** Learn to design Database operations and implement using PL/SQL programs.

**CO6:** Learn basics of PL/SQL and develop programs using Cursors, Exceptions.

<b>Title of the Course</b>	<b>ELECTIVE I A: CLOUD COMPUTING</b>						
<b>Paper No.</b>	<b>Discipline Specific Elective-IA</b>						
<b>Category</b>	<b>Elective</b>	<b>Year</b>	III	<b>Credits</b>	3	<b>Course Code</b>	UECAA24
		<b>Semester</b>	VI				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	5	-	-		5		
<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. Learning fundamental concepts and Technologies of Cloud Computing.</li> <li>2. Learning various cloud service types and the viruses and pitfalls.</li> <li>3. To learn about Cloud Architecture and Application design.</li> <li>4. To know the various aspects of application design, bench marking and security on the Cloud.</li> <li>5. To learn the various Case Studies in Cloud Computing.</li> </ol>						
<b>Course Outline</b>	<b>UNIT-I :(15 hours)</b> 1.1 Introduction to Cloud Computing: Definition of Cloud Computing – Characteristics of Cloud Computing. 1.2 Cloud Models – Cloud Service Examples – Cloud-based Services and Applications. 1.3 Cloud Concepts and Technologies: Virtualization – Load balancing. 1.4 Scalability and Elasticity – Deployment – Replication – Monitoring. 1.5 Software Defined Networking – Network Function Virtualization. 1.6 Map Reduce – Identity and Access Management – Service Level Agreements – Billing.						
	<b>UNIT-II: (15 hours)</b> 2.1 Cloud Services: Compute Services: Amazon Elastic Computer Cloud - Google Compute Engine - Windows Azure Virtual Machines. 2.2 Storage Services: Amazon Simple Storage Service - Google Cloud Storage - Windows Azure Storage. 2.3 Database Services: Amazon Relational Data Store - Amazon Dynamo DB - Google Cloud SQL - Google Cloud Data Store - Windows Azure SQL Database – Windows Azure Table Service. 2.4 Application Services: Application Runtimes and Frameworks – Queuing Services – Email Services –Notification Services – Media Services. 2.5 Content Delivery Services: Amazon Cloud Front – Windows Azure						

Content Delivery Network Analytics Services: Amazon Elastic Map Reduce - Google Map Reduce Service – Google Big Query –Windows Azure HD Insight.

2.6 Deployment and Management Services: Amazon Elastic Beanstack – Amazon Cloud Formation - Identity and Access Management Services: Amazon Identity and Access Management –Windows Azure Active Directory Open Source Private Cloud Software: Cloud Stack – Eucalyptus – Open Stack.

**UNIT-III: (15 hours)**

3.1 Cloud Application Design: Introduction – Design Consideration for Cloud Applications.  
3.2 Scalability–Reliability and Availability– Security – Maintenance and Upgradation.  
3.3 Performance – Reference Architectures for Cloud Applications.  
3.4 Cloud Application Design Methodologies: Service Oriented Architecture(SOA).  
3.5 Cloud Component Model, IaaS, PaaS and SaaS Services for Cloud Applications, Model View Controller (MVC), REST ful Web Services.  
3.6 Data Storage Approaches: Relational Approach (SQL), Non-Relational Approach (NoSQL).

**UNIT-IV: (15 hours)**

4.1 Cloud Application Bench marking and Tuning: Introduction to Benchmarking – Steps in Benchmarking.  
4.2 Workload Characteristics – Application Performance Metrics.  
4.3 Design Consideration for Benchmarking Methodology–Benchmarking Tools and Types of Tests- Deployment Prototyping.  
4.4 Cloud Security: Introduction – CSA Cloud Security Architecture – Authentication (SSO).  
4.5 Authorization–Identity and Access Management.  
4.6 Data Security : Securing data at rest, securing data in motion –Key Management–Auditing.

**UNIT-V :(15 hours)**

5.1 Case Studies: Cloud Computing for Healthcare

	5.2 Cloud Computing for Energy Systems 5.3 Cloud Computing for Transportation Systems 5.4 Cloud Computing for Manufacturing Industry 5.5 Cloud Computing for Education.

Learn how to identify and select appropriate software metrics based on project goals.</li> <li>3. Acquire knowledge and skills in collecting and measuring software metrics.</li> <li>4. Learn how to analyze and interpret software metrics data to extract valuable insights.</li> <li>5. Gain the ability to evaluate software quality using appropriate metrics.</li> </ol>						
<b>Course Outline</b>	<b>UNIT-I :(15 hours)</b> 1.1 Fundamentals of Measurement: Need for Measurement: 1.2 Measurement in Software Engineering, Scope of Software Metrics. 1.3 The Basics of measurement: The representational theory of measurement. 1.4 Measurement and models. 1.5 Measurement scales and scale types, meaningfulness in measurement.						
	<b>UNIT-II: (15 hours)</b> 2.1 A Goal- Based Framework For Software Measurement: Classifying software measures. 2.2 Determining what to Measure, Applying the framework. 2.3 Software measurement validation, Performing Software Measurement Validation. 2.4 Empirical investigation: Principles of Empirical Studies, Planning Experiments. 2.5 Planning case studies as quasi-experiments 2.6 Relevant and Meaningful Studies.						

	<p><b>UNIT-III :(15 hours)</b></p> <p>3.1 Software Metrics Data Collection: Defining good data.</p> <p>3.2 Data collection for incident reports, How to collect data, Reliability of data collection Procedures.</p> <p>3.3 Analyzing software measurement data.</p> <p>3.4 Statistical distributions and hypothesis testing.</p> <p>3.5 Classical data analysis techniques</p> <p>3.6 Examples of simple analysis techniques.</p> <hr/> <p><b>UNIT-IV: (15 hours)</b></p> <p>4.1 Measuring internal product attributes: Size Properties of Software Size, Code size, Design size.</p> <p>4.2 Requirements analysis and Specification size, Functional size measures and estimators, Applications of size measures.</p> <p>4.3 Measuring internal product attributes: Structure: Aspects of Structural Measures.</p> <p>4.4 Control flow structure of program units, Design-level Attributes.</p> <p>4.5 Object-oriented Structural attributes and measures.</p> <hr/> <p><b>UNIT-V: (15 hours)</b></p> <p>5.1 Measuring External Product Attributes: Modelling software quality.</p> <p>5.2 Measuring aspects of quality, Usability Measures, Maintainability measures, Security Measures</p> <p>5.3 Software Reliability.</p> <p>5.4 Measurement and Prediction: Basic of reliability theory, The software reliability problem.</p> <p>5.5 Parametric reliability growth models</p> <p>3.6 Predictive accuracy.</p>

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Understand various fundamentals of measurement and software metrics.

**CO2:**Identify frame work and analysis techniques for software measurement.

**CO3:** Apply internal and external attributes of software product for effort estimation.

**CO4:**Use appropriate analytical techniques to interpret software metrics data and derive meaningful insights.

**CO5:**Recommend reliability models for predicting software quality.

		<b>Semester</b>	VI				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	6	-	-		6		
<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. Understanding the design of the Operating System.</li> <li>2. Imparting knowledge on CPU scheduling, Process and Memory Management.</li> <li>3. To code specialized programs for managing over all resources and operations of the computer.</li> <li>4. To study about the concept of Job and process or scheduling.</li> <li>5. To learn about the concept of memory organization and multi programming.</li> </ol>						
<b>Course Outline</b>	<b>UNIT-I :(15 hours)</b> 1.1 Introduction: operating system, history (1990sto2000and beyond). 1.2 Distributed computing, parallel computation. 1.3 Process concepts:definition of process, process states-Life cycle of a process, process management-process state transitions, process control block (PCB). 1.4 Process operations, suspend and resume. 1.5 Context switching, Interrupts-Interrupt processing, interrupt classes. 1.6 Inter process communication - signals, message passing.						
	<b>UNIT-II: (15 hours)</b> 2.1 Asynchronous concurrent processes:mutual exclusion- critical section, mutual exclusion primitives. 2.2 Implementing mutual exclusion primitives, Petersons, algorithm. 2.3 Software solutions to the mutual Exclusion Problem-n-thread mutual exclusion. 2.4 Lamp posts Bakery- Algorithm Semaphores – Mutual exclusion with Semaphores. 2.5 Thread synchronization with semaphores, counting semaphores. 2.6 Implementing semaphores. Concurrent programming: Monitors, message						

	<p>passing.</p> <p><b>UNIT-III: (15 hours)</b></p> <p>3.1 Deadlock and indefinite Postponement: Resource concepts.</p> <p>3.2 Four necessary conditions for deadlock.</p> <p>3.3 Deadlock prevention, deadlock avoidance.</p> <p>3.4 Dijkstra's Banker's algorithm.</p> <p>3.5 Deadlock election, deadlock recovery.</p> <p><b>UNIT-IV: (15 hours)</b></p> <p>4.1 Job and processor scheduling: scheduling levels, scheduling objectives.</p> <p>4.2 Scheduling criteria, preemptive vs non-preemptive scheduling.</p> <p>4.3 Interval timer or interrupting clock, priorities, scheduling algorithms - FIFO scheduling.</p> <p>4.4 RR scheduling, quantum size, SJF scheduling.</p> <p>4.5 SRT scheduling, HRN scheduling, multilevel feedback queues - Fair share scheduling.</p> <p><b>UNIT-V :(15 hours)</b></p> <p>5.1 Real Memory organization and Management: Memory organization, Memory management, Memory hierarchy,</p> <p>5.2 Memory management strategies, contiguous vs non – contiguous memory allocation, single user contiguous memory allocation, fixed partition multi programming, variable partition multi programming.</p> <p>5.3 Memory swapping - Virtual Memory organization: virtual memory basic concepts, multilevel storage organization.</p> <p>5.4 Block mapping, paging basic concepts, segmentation.</p> <p>5.5 Paging / segmentation systems.</p> <p>5.6 Virtual Memory Management: Demand Paging, Pager replacement strategies.</p>

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Define the fundamentals of OS and identify the concepts relevant to process, process lifecycle, Scheduling Algorithms, Deadlock and Memory management.

**CO2:** Know the critical analysis of process involving various algorithms, an exposure to threads and semaphores.

**CO3:** Have a complete study about Deadlock and its impact over OS. Knowledge of handling Deadlock with respective algorithms and measures to retrieve from deadlock.

**CO4:** Have complete knowledge of Scheduling Algorithms and its types.

**CO5:** Understand memory organization and management

<b>Pre requisites</b>	Higher Secondary level						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. To understand the problem solving approaches.</li> <li>2. To learn the basic programming constructs in R Programming</li> <li>3. To practice various computing strategies for R Programming-based solutions to real world problems.</li> <li>4. To use R Programming data structures-lists, tuples, and dictionaries.</li> </ol>						
<b>Course Outline</b>	<p><b>Practical Program: (Hours: 40 )</b></p> <ol style="list-style-type: none"> <li>1. Program to convert the given temperature from Fahrenheit to Celsius and vice versa depending Upon user's choice.</li> <li>2. Program, to find the area of rectangle, square, circle and triangle by accepting suitable input Parameters from user.</li> <li>3. Write a program to find list of even numbers from 1 to n using R-Loops.</li> <li>4. Create a function to print squares of numbers in sequence.</li> <li>5. Write a program to join columns and rows in a data frame using c bind() and r bind() in R.</li> <li>6. Implement different String Manipulation functions in R.</li> <li>7. Implement different data structures in R (Vectors, Lists, Data Frames).</li> <li>8. Write a program to read a csv file and analyze the data in the file in R.</li> <li>9. Create pie chart and bar chart using R.</li> <li>10. Create a data set and do statistical analysis on the data using R.</li> <li>11. Create a data set and do statistical analysis on the data using R.</li> <li>12. Write a R program to count the number of even and odd numbers from array of N numbers.</li> </ol>						

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Acquire programming skills in core R Programming.

**CO2:** Acquire Object-oriented programming skills in R Programming.

**CO3:** Develop the skill of designing graphical-user interfaces (GUI) in R Programming.

**CO4:** Acquire R Programming skills to move into Specific branches.

<b>Title of the Course</b>	<b>PRACTICAL VII: LINUX</b>						
<b>Paper No.</b>	<b>Core 16</b>						
<b>Category</b>	<b>Practical</b>	<b>Year</b>	III	<b>Credits</b>	2	<b>Course Code</b>	UCCAP24
		<b>Semester</b>	VI				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	-	-	3		3		
<b>Prerequisites</b>							
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. To provide the skills in Linux Shell Script.</li> <li>2. To learn programmatically to implement simple OS mechanisms.</li> <li>3. To understand shell script in files.</li> <li>4. To learn about standard, I/O and system calls.</li> <li>5. To learn suspending and resuming process.</li> </ol>						
<b>Course Outline</b>	<p><b>Practical Programs (45 Hours) (K5,K6)</b></p> <ol style="list-style-type: none"> <li>1. Write a shell script that accepts a file name, starting and ending line numbers as arguments and displays all the lines between the given line numbers.</li> <li>2. Write a shell script that displays a list of all files in the current directory to which the user has read, write and execute permissions.</li> <li>3. Write a shell script to find the factorial of a given number.</li> <li>4. Write a C program that makes a copy of a file using standard I/O and system calls.</li> <li>5. Implement in C the following Linux commands using system call (a) cat (b) ls (c) mv.</li> <li>6. Write a C program to list every file in a directory, its inode number and file name.</li> <li>7. Write a C program that illustrates how to execute two commands concurrently with a command pipe. Ex: ls -l   sort.</li> <li>8. Write a C program that illustrates suspending and resuming processes using signals.</li> <li>9. Write a C program that implements a producer-consumer system with two processes (using semaphores).</li> <li>10. Write a C program that illustrates two processes communicating using shared memory.</li> </ol>						

**Course Outcomes:**

The Learners will be able to

1. Get familiar with the GCC compiler and files.
2. Understand the high-level structure of the Linux kernel both in concept and source code.
3. Acquire a detailed understanding of one aspect (the scheduler) of the Linux kernel.
4. Learn to develop software for Linux systems.
5. Obtain a foundation for an advanced course in operating systems.

**Course Outcomes:**

**On completion of the course the students should be able to**

**CO1:** Work with bigdata tools and its analysis techniques.

**CO2:** Analyze data by utilizing clustering and classification algorithms.

**CO3:** Learn and apply different mining algorithms and recommendation systems for large volumes of data.

**CO4:** Perform analytics on datastreams.

**CO5:** Learn No SQL databases and management.

<b>Title of the Course</b>	<b>ELECTIVE III B: CYBER SECURITY</b>						
<b>Paper No.</b>	<b>Discipline Specific Elective 3B</b>						
<b>Category</b>	<b>Elective</b>	<b>Year</b>	III	<b>Credits</b>	3	<b>Course Code</b>	UECAF24
		<b>Semester</b>	VI				
<b>Instructional hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	4		-		4		
<b>Prerequisites</b>	Network Security						
<b>Objectives of the course</b>	<ol style="list-style-type: none"> <li>1. To introduce the basic concepts of Cyber Security.</li> <li>2. To acquire knowledge on cyber threats and attacks.</li> <li>3. To become aware of significant security technologies and tools.</li> <li>4. Analyze the cyber security needs of an organization.</li> <li>5. Examine software vulnerabilities and security solutions to reduce the risk of exploitation.</li> </ol>						
<b>Course Outline</b>	<b>Unit I (12 Hours) (K1, K2)</b> Introduction to Information Security: Components of Information system – Software Development Life Cycle – Security Software Development Life Cycle- Security Professionals and the organization- Communicates of Interest.						
	<b>Unit II (12 Hours) (K1, K2)</b> Need for Security: Introduction – Business Need First – Threats – Attacks – Secure Software Development.						
	<b>Unit III (12 Hours) (K1, K2)</b> Security Technologies: Introduction – Access Control – Firewall- Protecting Remote Connections – Intrusion Detection and Prevention System – Honeypots – Scanning and Analysis Tools – Biometric Access Control.						
	<b>Unit IV (12 Hours) (K3, K4)</b> Cryptography: Foundation of Cryptology - Cipher Methods - Cryptographic Algorithms - Cryptographic Tools - Protocols for Communication - Attacks on Cryptosystems.						
	<b>Unit V (12 Hours) (K3, K4)</b> Risk Management: An overview of Risk Management – Risk Identification – Risk Assessment – Risk Control Strategy – Risk Management - Risk Control Practices.

<b>Title of the Course</b>	<b>ELECTIVE IV B: NATURAL LANGUAGE PROCESSING</b>						
<b>Paper No.</b>	<b>Discipline Specific Elective 4B</b>						
<b>Category</b>	<b>Core</b>	<b>Year</b>	III	<b>Credits</b>	3	<b>Course Code</b>	UECAH24
		<b>Semester</b>	VI				
<b>Instructional Hours per week</b>	<b>Lecture</b>	<b>Tutorial</b>	<b>Lab Practice</b>		<b>Total</b>		
	5	-	-		5		
<b>Prerequisites</b>	Solid foundation of Mathematics, Programming and Data Structures, Machine Learning Basics.						
<b>Objectives of the course</b>	<p>This course aims at providing an overall view of the</p> <ul style="list-style-type: none"> <li>• To understand approaches to syntax and semantics in NLP.</li> <li>• To learn natural language processing and to learn how to apply basic algorithms in this field.</li> <li>• To understand approaches to discourse, generation, dialogue and summarization within NLP.</li> <li>• To get acquainted with the algorithmic description of the main language levels: morphology, syntax, semantics, pragmatics etc.</li> <li>• To understand current methods for statistical approaches to machine translation.</li> </ul>						
<b>Course Outline</b>	<p><b>UNIT-I (15 hours) (K1, K2)</b></p> <p>1.1 Introduction: Natural Language Processing tasks in syntax, semantics, and pragmatics.</p> <p>1.2 Issue- Applications – The role of machine learning.</p> <p>1.3 Probability Basics- Information theory.</p> <p>1.4 Collocations -N-gram Language Models.</p> <p>1.5 Estimating parameters and smoothing.</p> <p>1.6 Evaluating language models.</p>						
	<p><b>UNIT-II (15 hours) (K1, K2)</b></p> <p>2.1 Word level and Syntactic Analysis: Word Level Analysis - Regular Expressions-Finite.</p> <p>2.2 State Automata-Morphological Parsing.</p> <p>2.3 Spelling Error Detection and correction.</p> <p>2.4 Words and Word classes – Part of Speech Tagging.</p> <p>2.5 Syntactic Analysis: Context Free Grammar.</p> <p>2.6 Constituency – Parsing-Probabilistic Parsing.</p>						
	<p><b>UNIT-III (15 hours) (K1, K2)</b></p> <p>3.1 Semantic analysis and Discourse Processing: Semantic Analysis - Meaning Representation.</p> <p>3.2 Lexical Semantics- Ambiguity.</p>						

	<p>3.3 Word Sense Disambiguation.</p> <p>3.4 Discourse Processing: cohesion- Reference Resolution.</p> <p>3.5 Discourse Coherence and Structure.</p>
	<p><b>UNIT-IV (15 hours) (K1, K2)</b></p> <p>4.1 Natural Language Generation: Architecture of NLG Systems.</p> <p>4.2 Generation Tasks and Representations.</p> <p>4.3 Application of NLG. Machine Translation: Problems in Machine Translation.</p> <p>4.4 Characteristics of Indian Languages- Machine Translation Approaches.</p> <p>4.5 Translation involving Indian Languages.</p>
	<p><b>UNIT-V (15 hours) (K1, K2)</b></p> <p>5.1 Information retrieval and lexical resources: Information Retrieval: Design features of Information Retrieval Systems.</p> <p>5.2 Classical - Non-classical.</p> <p>5.3 Alternative Models of Information Retrieval.</p> <p>5.4 Valuation Lexical Resources: WorldNet-Frame Net Stemmers.</p> <p>5.5 POS Tagger.</p> <p>5.6 Research Corpora SSAS.</p>

<b>Recommended Text</b>	<p>1. Daniel Jurafsky, James H. Martin, "Speech &amp; language processing", Pearson publications.</p> <p>2. Allen, James. Natural language understanding. Pearson, 1995.</p>
<b>Reference Books</b>	<p>1. Pierre M. Nugues, "An Introduction to Language Processing with Perl and Prolog", Springer.</p>

<p><b>Course Outcomes:</b></p> <p><b>The Learners will be able to</b></p> <ol style="list-style-type: none"> <li>Describe the fundamental concepts and techniques of natural language processing. Explain the advantages and disadvantages of different NLP technologies and their applicability in different business situations.</li> <li>Distinguish among the various techniques, taking into account the assumptions, strengths, and weaknesses of each. Use NLP technologies to explore and gain a broad understanding of text data.</li> </ol>
---

3. Use appropriate descriptions, visualizations, and statistics to communicate the problems and their solutions. Use NLP methods to analyse sentiment of a text document.
4. Analyse large volume text data generated from a range of real-world applications. Use NLP methods to perform topic modelling.
5. Develop robotic process automation to manage business processes and to increase and monitor their efficiency and effectiveness.
