

Event : Chemistry Beyond the Classroom
Date : 23/07/2026
Organised by : PG and Research Department of Chemistry
Academic Year : 2026 - 2027

Report :

The Chemsphere Club organized a resource talk on “**Chemistry Beyond the Classroom**” on **23 July 2026** to provide students with insights into the practical applications and emerging opportunities in the field of chemistry beyond academic learning. The programme commenced with a prayer song and warm welcome address delivered by **Ms. Nirmala, III B.Sc. Chemistry**. The chief guest was felicitated by **Dr. J. Rosaline Ezhilarasi**, HOD & Associate Professor, PG and Research Department of Chemistry, Auxilium College(A), Vellore as a mark of respect and appreciation for his contribution to academia and research.

The **Resource Person, Mr. S. Shameem Abdul Kadar**, delivered an informative and engaging lecture on the topic “**Chemistry Beyond the Classroom.**” He elaborated on the various steps involved in drug synthesis including the identification of target molecules, selection of suitable starting materials, chemical reactions involved in the synthesis process, purification techniques, characterization of synthesized compounds and quality control measures. He also highlighted the importance of research, innovation and safety protocols in the development of pharmaceutical products. The session was highly interactive, with students actively participating and clarifying their doubts during the discussion. The programme concluded with a **Vote of Thanks** proposed by **Ms. Lakshana, III B.Sc. Chemistry**, and ended with college anthem.
